

coffee
THE J2 WAY

The Process

- 1** Source only the **top 10%** of green coffee beans in the most **premier growing** regions such as South America, Africa, Indonesia and Kona.
- 2** Mix **old world artisan** batch roasting with 21st century technology which is overseen by our **4th generation roastmaster**.
- 3** The **proprietary grind** of utilizing 3 different particle sizes is optimized to guarantee our blend meets the highest quality.
- 4** **State-of-the-art**, energy efficient facility produces quality and consistency with every end cup.

Protecting quality of product through stages of production, aligns with proper timing from roast to grind to packaging.

WHAT IS THE J2 WAY?

- Reduce customer costs with better solutions
- Improve customers' productivity
- Make acquiring products easier for our customers
- Protect our customers' brand

"We promise to do our best each and every time to meet our customers' needs with exceptional service and solutions."

Innovative

Ribbed Design

- 43% more extraction than the competition.
- Higher Total Dissolvable Solids, or TDS, than the competition.

Pod Dimple

- Reduces surface area inside of cup and allows higher end cup extraction.
- Supports weighted filter from breaking during brew.

Precise Dosing

- Use of Filter Spray technology to ensure consistent flavor profile and efficiencies in production.

Sustainable

Why Polypropylene #5?

- Accepted in 75% of recycling centers in the USA.
- Better oxygen and moisture barrier providing an 18 month shelf life.

Pull Tab Lid

1. COOL

Allow pod to cool.

2. PEEL

Peel off lid. Discard or compost filter and grounds.

3. RECYCLE

Recycle pod wherever #5 plastics are composted.
