

**sno-plow™
icemelt**

THE J2 WAY

Sno-Plow™ snow & ice melter is 100% soluble, free of dangerous chemicals, easy to apply, pelletized and friendly to nature.

- Each individual Sno-Plow granule is now coated with Liqui-Fire™ melting enhancer. Unlike many salt and pepper ice melters, (one granule of this and one granule of that), each granule of Sno-Plow works individually for maximum performance.
- Liqui-Fire is very safe. It is less toxic than baking soda. Sno-Plow snow and ice melter contains no dangerous chemicals. It can be handled safely with bare hands. 100% non-toxic to children and pets.
- Sno-Plow green colored granules reduce the possibility of over-application, the major cause of tracking problems. Sno-Plow with Liqui-Fire is safe on carpets and floors. Leaves no oily residue.
- Sno-Plow is safe for concrete when used according to the manufacturers recommendations. When used on concrete do not use in excess of specifications listed by the manufacturer.

WHAT IS **THE J2 WAY?**

- Reduce customer costs with better solutions
- Improve customers' productivity
- Make acquiring products easier for our customers
- Protect our customers' brand

“We promise to do our best each and every time to meet our customers’ needs with exceptional service and solutions.”

- Liqui-Fire effectively lowers the working temperature range of Sno-Plow allowing it to work up to 3 times faster than ordinary ice melters. The Liqui-Fire in Sno-Plow has a maximum freezing point of -2TF (-32° C).
- Sno-Plow is available in five convenient sizes and packages, ranging from 25# to 100# containers and Sno-Plow is very economical to use. If used according to label directions you will use less product per sq. ft. than most other ice melters on the market.

- Unlike many other ice melters, Liqui-Fire contains an anti-corrosion chemical to help fight corrosion to exposed metal.
- Compared to many other ice melters, Liqui-Fire maintains the free flowing nature of Sno-Plow for easier application and unlimited shelf life.
- Sno-Plow starts working on contact and is less likely to attract moisture and to cake.
- Sno-Plow will not harm trees, shrubs, lawns or other vegetation when used as directed.
